

**Increase maintenance efficiency,
operational safety and sustainability**

AVENTICS™ PneuMare tailored global servicing
Maintain your pneumatically controlled marine engine over its
full operational life

AVENTICS PneuMare tailored servicing provides cost and efficiency savings.

Emerson's AVENTICS pneumatic and electronic ship control components have been used within the marine industry for decades. Supporting these reliable solutions is our in-depth consultancy and extensive engineering expertise that enables us to stand by your side from the start of a project, through commissioning and over the life of a vessel.

Service and support are an integral part of our business and for operators of ships with pneumatically controlled 2-stroke-engines we have created the PneuMare concept. Supported by a vast network of service partners, PneuMare provides continuous, worldwide support over the complete operational life of a ship's engine. Instead of firefighting issues, maintenance is systematically planned with consideration to the lifespan and service requirements of the pneumatic components installed.

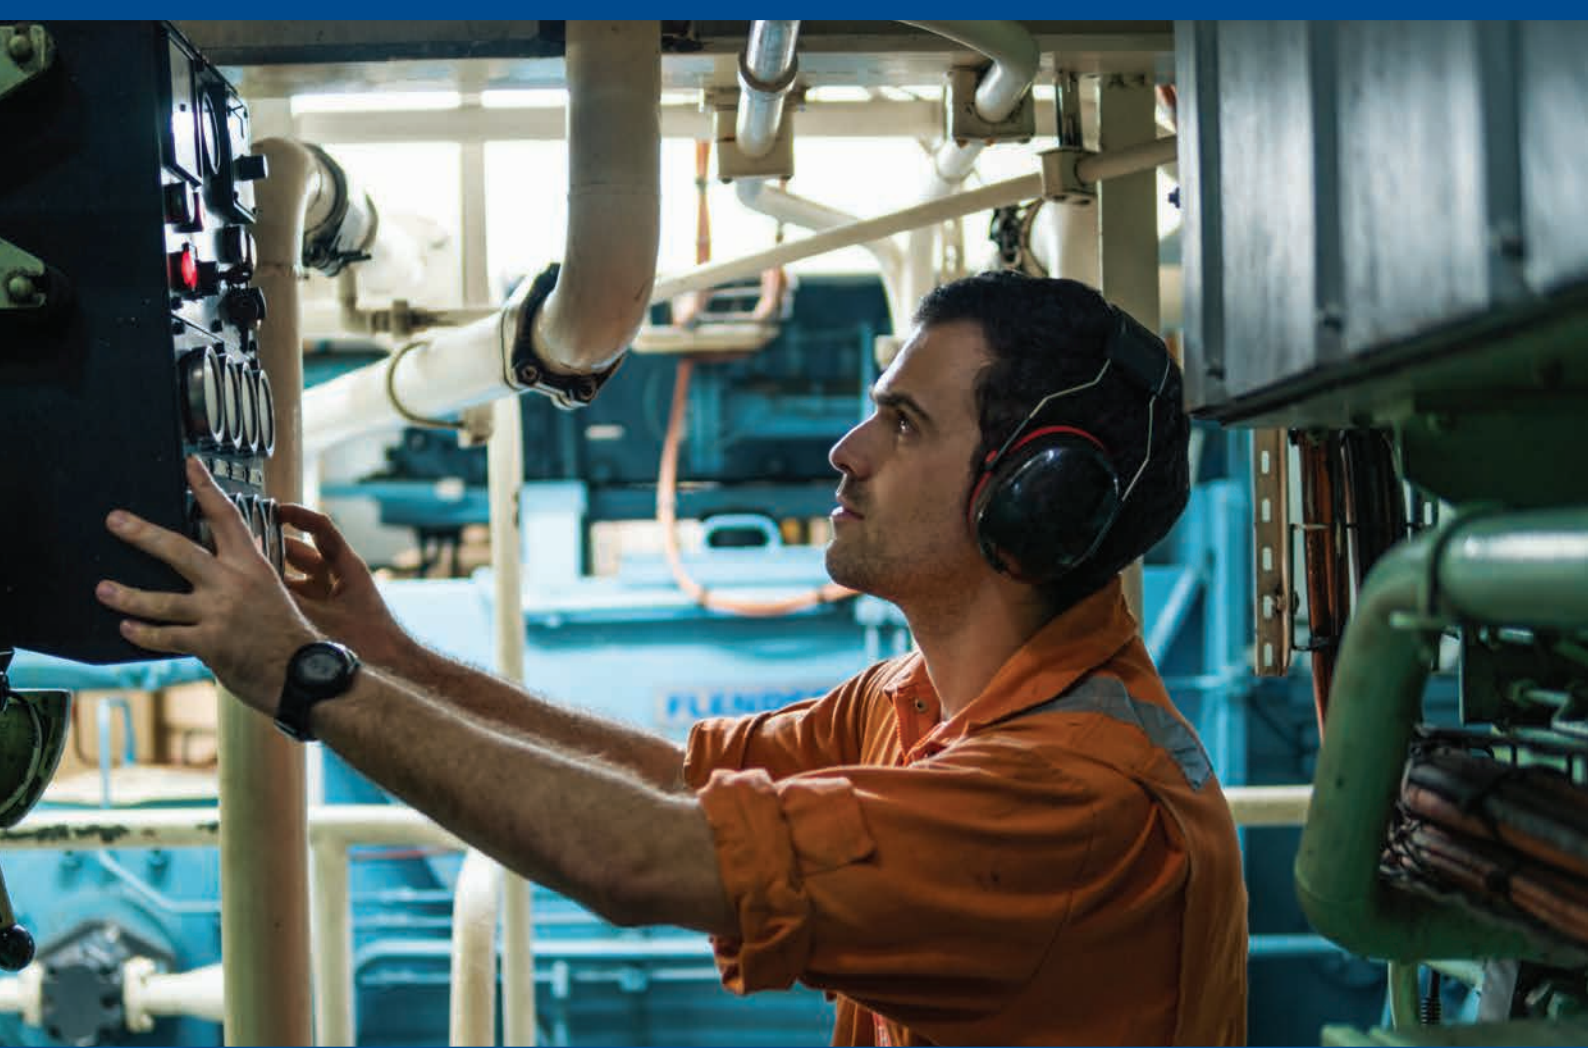

PneuMare consists of an extensive range of service packages tailored to specific engine types. This servicing can be provided whenever a ship is undergoing routine maintenance at any of the major shipping industry hot spots around the world. Using our expertise and experience with the pneumatic products applied and their anticipated lifespan, we can advise you of the appropriate service package for your technology and budget.

Benefits of PneuMare – The perfect fit for your engine

PneuMare begins with the supply of ready-to-be installed spare parts and components, but the scope of the servicing can be much wider. Depending on your requirements and available budget, we can be responsible for the entire service workload for the engine pneumatics.

- Inspection of the existing system by a service technician
- Identification of the service requirements
- Proposal of service package
- Supply of parts and components
- Installation on board
- Readjustment of the pneumatic system
- Acceptance of incorrectly ordered and repairable parts on a goodwill basis

Time- and cost-effectiveness

- Unplanned downtimes and service costs are avoided
- The service packages are available worldwide at short notice
- No need to monitor service intervals

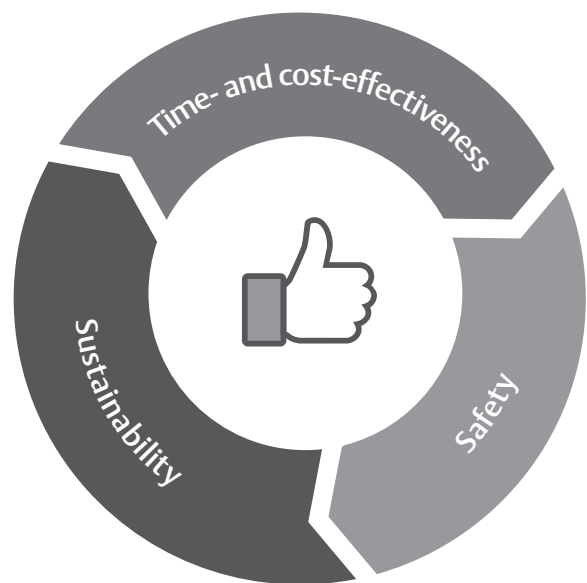

Safety

- Parts from the original manufacturer ensure safe operation
- Systematic maintenance provides continued operability
- Installation by skilled service technicians

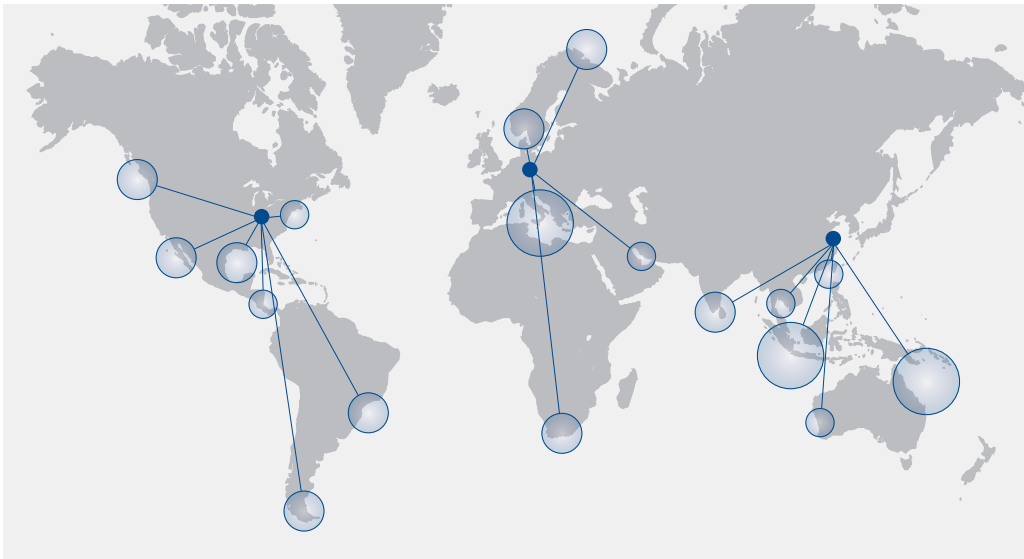

Sustainability

- Correct adjustment of the pneumatic system saves fuel
- Optimized processes help to protect the engine
- Reuse of repairable parts

Increase operational safety, and maintenance and engine efficiency over the life of your vessel

AVENTICS™

AVENTICS PneuMare servicing can be provided during routine ship maintenance at any of the major shipping industry hot spots around the world.
