BETTIS

October 8, 2013

Reference: Bettis CB Series, T Series and RPC Series Obsolescence

In keeping with Bettis's commitments to continually evolve our products, streamline our portfolio and focus our resources on technologies with highest customer value, we have discontinued of the **Bettis CB Series, T Series and RPC Series** product. We went through the process of evaluating the Product Design and Manufacturing Techniques for Bettis T Series and introduced **Bettis CBB, CBA-300, and G series** as our replacement product offering.

This letter confirms to your company that Bettis has discontinued the manufacture of **Bettis CB Series, T Series and RPC Series** products.

- Last Committed Availability of Durable Replacement Components (e.g. piston) - **2010**
- Last Committed Availability of Wear-out items (e.g. metal bearings) - **2010**
- Last Committed Availability of Maintenance Components (e.g. seal kits) – **On-Going**
- Last Committed Customer Service and Engineering Support – **On-going**

○ **Literature and Technical Information**

All related technical information (brochures, torque, volume, dimensions etc.) will continue to be published on our website Product section under "Discontinued Product"

<http://www2.emersonprocess.com/en-US/brands/bettis/products/discontinuedProducts/Pages/discontinuedProducts.aspx>

For further information please contact your Bettis regional sales representative or call +1-281-477-4100 to obtain a sales contact.

Thanks and Regards

Sincerely ,

A handwritten signature in black ink, appearing to read "D. Eldridge".
