(1) EC-Type Examination Certificate

(2) - Directive 94/9/EC -

**Equipment and protective systems intended for use
in potentially explosive atmospheres**

(3) BVS 03 ATEX E 177 X

(4) Equipment: Sensor type H*** *****Z*****

(5) Manufacturer: Micro Motion, Inc.

(6) Address: Boulder, Co. 80301, USA

(7) The design and construction of this equipment and any acceptable variation thereto are specified in the schedule to this type examination certificate.

(8) The certification body of EXAM BBG Prüf- und Zertifizier GmbH, notified body no. 0158 in accordance with Article 9 of the Directive 94/9/EC of the European Parliament and the Council of 23 March 1994, certifies that this equipment has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment and protective systems intended for use in potentially explosive atmospheres, given in Annex II to the Directive.

The examination and test results are recorded in the test and assessment report BVS PP 03.2118 EG.

(9) The Essential Health and Safety Requirements are assured by compliance with:

EN 50014:1997+A1-A2 General requirements
EN 50020:2002 Intrinsic safety 'i'

(10) If the sign "X" is placed after the certificate number, it indicates that the equipment is subject to special conditions for safe use specified in the schedule to this certificate.

(11) This EC-Type Examination Certificate relates only to the design, examination and tests of the specified equipment in accordance to Directive 94/9/EC.

Further requirements of the Directive apply to the manufacturing process and supply of this equipment. These are not covered by this certificate

(12) The marking of the equipment shall include the following:

(15) 15.1 Subject and type

Sensor type H**** *****Z*****

Instead of the *** letters and numerals will be inserted which characterise the following modifications:

type H * * * * * * * * * * * Z * * * * *

15.2 Description

The flow sensor in combination with a transmitter is used for flow measurement.

The flow sensor, which consists of magnetically excited oscillating tubes, contains as electrical components coils, resistors, temperature sensors and terminals and connectors.

Instead of the junction box an enclosure with an integral mounted signal processing device type 700 can be used; this variation gets the denomination type H**** ***** (A, B, D, E)*Z***** for a steel enclosure and H**** ***** (Q, V, W or Y)*Z***** for an aluminium enclosure.

Alternatively a transmitter type *700***** can be mounted directly to the junction box; this variation gets the denomination type H**** ***** (C or F)*Z*****.

Alternatively a transmitter type IFT9701***** can be integrally mounted on the sensor; this variation gets the denomination type H**** *****I*Z*****.

By mounting the sensor directly to the transmitter the use of the unit will be modified according to the following table:

Sensor	H025 ******(C or F)*Z***** H050 ******(C or F)*Z***** H100 ******(C or F)*Z***** H200 ******(C or F)*Z*****
Transmitter type *700*11*****	EEx ib IIB+H ₂ T1-T5
Transmitter type *700*1(3 or 4)*****	EEx ib IIC T1-T5

15.3 Parameters

15.3.1 Type H*** ******(R or H)*Z*****

15.3.1.1 Drive circuit (terminals 1 - 2 or wires red and brown)

Voltage	Ui	DC	11,4	V
Current	Ii		2,45	A
Power	Pi		2,54	W

effective internal capacitance

negligible

sensor type	inductance [mH]	coil resistance at -40 °C [Ω]	serial resistor at -40 °C [Ω]
H025 *****R*Z***** H025 *****H*Z*****	5,83	24,1	988,8
H050 *****R*Z***** H050 *****H*Z*****	5,83	24,1	469,7
H100 *****R*Z***** H100 *****H*Z*****	29,9	262,1	207,7
H200 *****R*Z***** H200 *****H*Z*****	9,4	37,4	148,3

15.3.1.2 Pick-Off coil (Terminals 5/9 and 6/8 or wires green/white and blue/grey)

Voltage	Ui	DC	30	V
Current	Ii		101	mA
Power	Pi		750	mW

effective internal capacitance

negligible

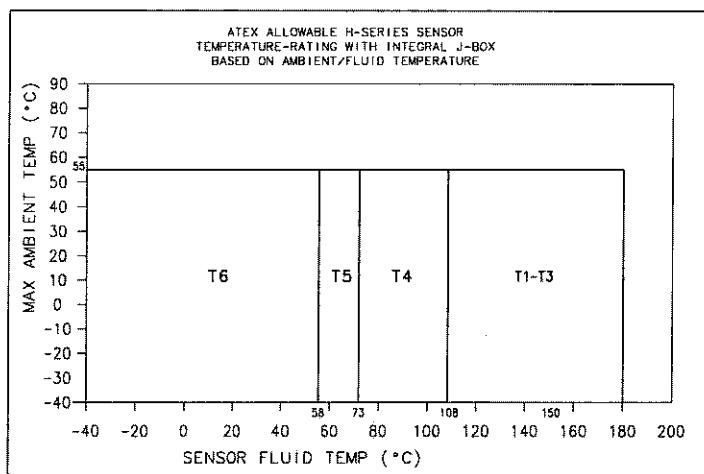

sensor type	inductance [mH]	coil resistance at -40 °C [Ω]	serial resistor at -40 °C [Ω]
H025 *****R*Z***** H025 *****H*Z*****	6,9	105	0
H050 *****R*Z***** H050 *****H*Z*****	6,9	105	0
H100 *****R*Z***** H100 *****H*Z*****	6,9	105	0
H200 *****R*Z***** H200 *****H*Z*****	23,8	182,5	0

15.3.1.3 Temperature circuit (terminals 3, 4 and 7 or wires orange, yellow and violet)

Voltage	Ui	DC	30	V
Current	Ii		101	mA
Power	Pi		750	mW
effective internal capacitance	Ci	negligible		
effective internal inductance	Li	negligible		

15.3.1.4 Regulation of temperature class

The classification into a temperature class depends on the temperature of the medium taking into account the maximum operating temperature of the sensor and is shown in the following graph:

15.3.1.5 Ambient temperature range

Ta -40 °C up to +55 °C

The use of the sensor at higher ambient temperatures is possible, provided that the ambient temperature does not exceed the maximum temperature of the medium taking into account the temperature classification and the maximum operating temperature of the sensor.

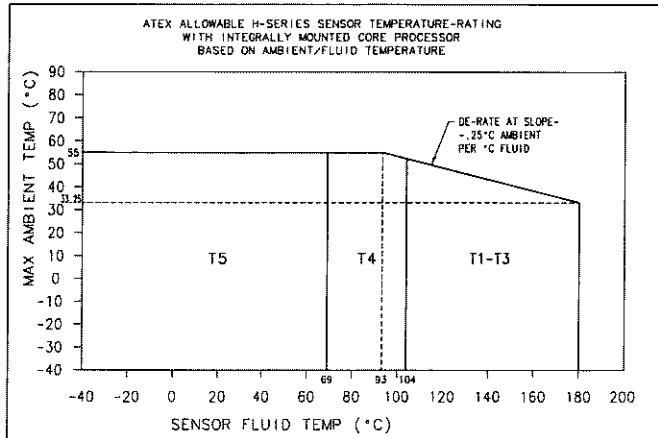

15.3.2 Type H**** *****(A,B,D,E,Q,V,W,Y)*Z*****

15.3.2.1 Input circuits (Terminals 1 - 4)

voltage	Ui	DC	17,3	V
current	Ii		484	mA
power	Pi		2,1	W
effective internal capacitance	Ci	2200	pF	
effective internal inductance	Li	30	μH	

15.3.2.2 Regulation of temperature class

The classification into a temperature class depends on the temperature of the medium taking into account the maximum operating temperature of the sensor and is shown in the following graph:

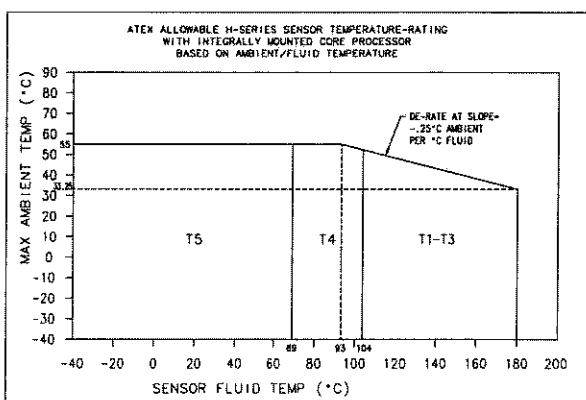

15.3.2.3 Ambient temperature range T_a -40°C up to $+55^{\circ}\text{C}$

15.3.3 Type H*** ***** (C oder F)*Z*****

15.3.3.1 Electrical parameters see DMT 01 ATEX E 082 X for the transmitter type *700*****

15.3.3.2 Regulation of temperature class

The classification into a temperature class depends on the temperature of the medium taking into account the maximum operating temperature of the sensor and is shown in the following graph:

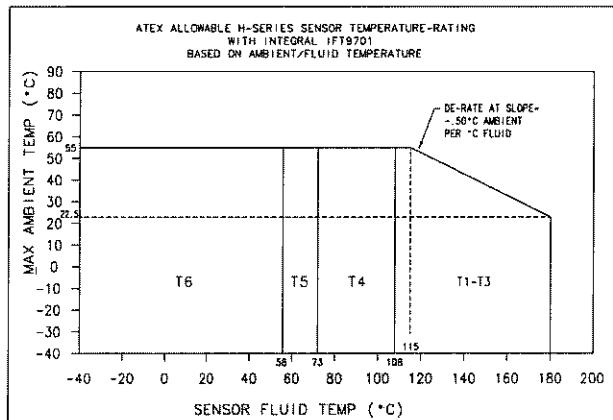

15.3.3.3 Ambient temperature range T_a -40°C up to $+55^{\circ}\text{C}$

15.3.4 Type H*** *****I*Z*****

15.3.4.1 Electrical parameters see BVS 03 ATEX E 168 X for the transmitter type IFT9701*****

15.3.4.2 Regulation of temperature class

The classification into a temperature class depends on the temperature of the medium taking into account the maximum operating temperature of the sensor and is shown in the following graph:

15.3.4.3 Ambient temperature range

T_a

-40 °C up to +55 °C

- (16) Test and assessment report
BVS PP 03.2118 EG as of 30.06.2003
- (17) Special conditions for safe use

By mounting the sensor type H**** *****C*Z***** or H**** *****F*Z***** directly to the transmitter *700***** the use of the unit will be modified according to the following:

1st Supplement

(Supplement in accordance with Directive 94/9/EC Annex III number 6)

to the EC-Type Examination Certificate BVS 03 ATEX E 177 X

Equipment: Sensor type H*** *****Z*****

Manufacturer: Micro Motion, Inc.

Address: Boulder, Co. 80301, USA

Description

The sensor can be modified according to the descriptive documents as mentioned in the pertinent test and assessment report and the version

type H300 *****Z*****

type of protection EEx ib IIB T1 – T6 is also available.

The Essential Health and Safety Requirements of the modified equipment are assured by compliance with:

EN 50014:1997+A1-A2 General requirements
EN 50020:2002 Intrinsic safety 'i'

Parameters

1 Type H300 *****R or H)*Z*****

1.1 Drive circuit (connections 1 - 2 or wires red and brown)

Voltage	Ui	DC	11,4	V
Current	Ii		2,45	A
Power	Pi		2,54	W
effective internal capacitance		negligible		

Sensor type	Inductance [mH]	Coil resistance at -40 °C [Ω]	Serial resistor at -40 °C [Ω]
H300 *****R*Z*****	11,75	83,5	7,9
H300 *****H*Z*****			

1.2 Pick-Off coil (Terminals 5/9 and 6/8 or wires green/white and blue/grey)

voltage	Ui	DC	30	V
current	Ii		101	mA
power	Pi		750	mW

effective internal capacitance negligible

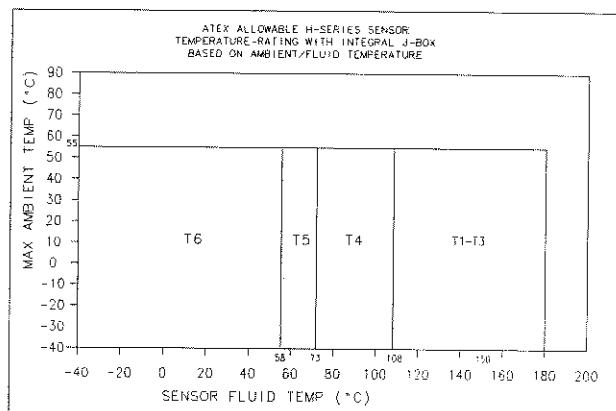

Sensor type	Inductance [mH]	Coil resistance at -40 °C [Ω]	Serial resistor at -40 °C [Ω]
H300 *****R*Z*****	12,4	128,4	569,3
H300 *****H*Z*****			

1.3 Temperature circuits (terminals 3, 4 and 7 or wires orange, yellow and violet)

Voltage	Ui	DC	30	V
Current	Ii		101	mA
Power	Pi		750	mW
effective internal capacitance	Ci	negligible		
effective internal inductance	Li	negligible		

1.4 Regulation of temperature class

The classification into a temperature class depends on the temperature of the medium taking into account the maximum operating temperature of the sensor and is shown in the following graph:

1.5 Ambient temperature range

Ta -40 °C up to +55 °C

The use of the sensor at higher ambient temperatures is possible, provided that the ambient temperature does not exceed the maximum temperature of the medium taking into account the temperature classification and the maximum operating temperature of the sensor.

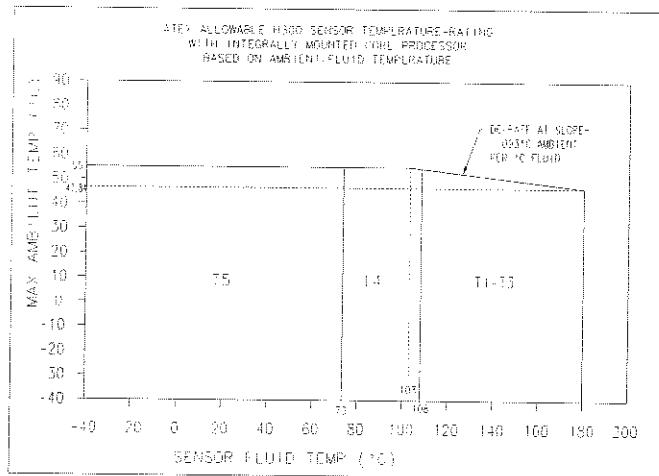

2 Type H300 *****(A,B,D,E,Q,V,W,Y)*Z*****

Translation 2nd Supplement

(Supplement in accordance with Directive 94/9/EC Annex III number 6)

to the EC-Type Examination Certificate **BVS 03 ATEX E 177 X**

Equipment: Sensor type H*** *****Z*****

Manufacturer: Micro Motion, Inc.

Address: Boulder, Co. 80301, USA

Description

The sensor can be modified according to the descriptive documents as mentioned in the pertinent test and assessment report.

The sensor type H200 *****Z***** may be produced with other coil parameters and gets the Construction Identification Code (C.I.C) A1.

The sensors may also be mounted to transmitters type Typ *7001(2, 4 or 5)*****.

The Essential Health and Safety Requirements of the modified equipment are assured by compliance with:

EN 50014:1997+A1-A2 General requirements

EN 50020:2002 Intrinsic safety 'i'

Modified parameters

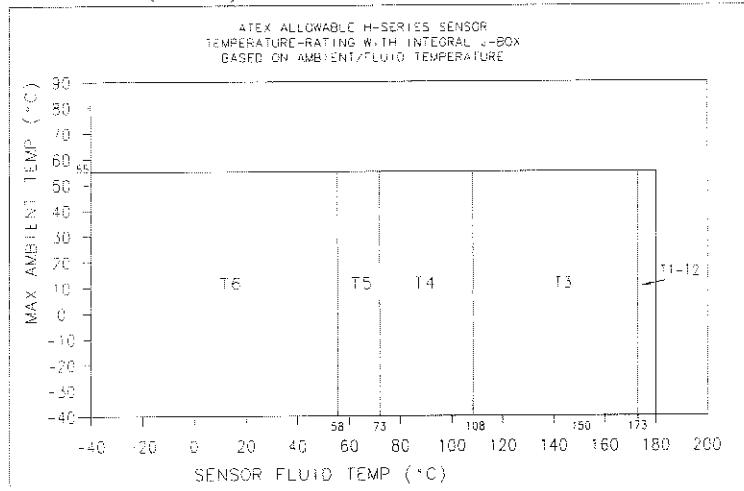

1	Pick-Off coil (Terminals 5/9 and 6/8 or wires green/white and blue/grey)	Ui	DC	30	V

4th Supplement

(Supplement in accordance with Directive 94/9/EC Annex III number 6)

to the EC-Type Examination Certificate BVS 03 ATEX E 177 X

Equipment: Sensor type H**** *Z*****

Manufacturer: Micro Motion, Inc.

Address: Boulder, Co. 80301, USA

Description

The sensor can be modified according to the descriptive documents as mentioned in the pertinent test and assessment report.

The sensors type H025 *****Z*****, type H050 *****Z***** and type H100 *****Z***** may be produced with other coil parameters and get the Construction Identification Code (C.I.C) A2.

The sensors can manufactured with modified electronic options:
type H*** *****(2, 3, 4, 5, 6, 7, 8, 9, S)*Z*****

Instead of the version with junction box (types H*** *****(R, H or S)*Z*****) an enclosure with an integral mounted signal processing device type 700 can be used; this variation gets the denomination type H*** *****(A, B, D or E)*Z***** for a stainless steel enclosure and type H*** *****(Q, V, W or Y)*Z***** for an aluminum enclosure.

When used with an integral mounted enhanced signal processing device type 800; the variation gets the denomination type H*** *****(3, 5, 7 or 9)*Z***** for a stainless steel enclosure and type H*** *****(2, 4, 6 or 8)*Z***** for an aluminum enclosure.

The maximum fluid temperature and the minimum fluid / ambient temperature have been modified.

The Essential Health and Safety Requirements of the modified equipment are assured by compliance with:

EN 50014:1997+A1-A2 General requirements

EN 50020:2002 Intrinsic safety 'i'

EN 50281-1-1:1998 +A1 Dust explosion protection

H200 ***** (R, H or S) *Z***** C.I.C A1	12,4	63,21	0 - 568,19	-138 °C
H300 ***** (R, H or S) *Z*****	12,4	128,4	0 - 569,3	-40 °C

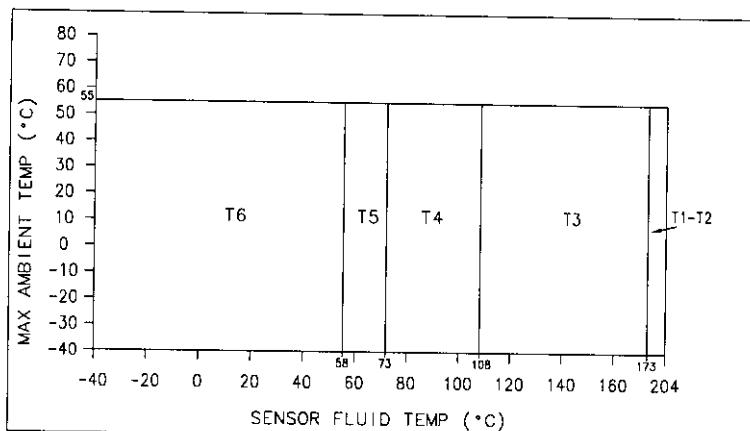

1.3 Temperature circuits (terminals 3, 4 and 7 or wires orange, yellow and violet)

Voltage	Ui	DC	30	V
Current	Ii		101	mA
Power	Pi		750	mW
effective internal capacitance		negligible		
effective internal inductance		negligible		

1.4 Temperature class/ max. surface temperature T

The classification into a temperature class/determination of the maximum surface temperature T depends on the temperature of the medium taking into account the maximum operating temperature of the sensor and are shown in the following graph:

- 1.4.1 For types H025 ******(R, H or S)*Z******, H050 ******(R, H or S)*Z******, H100 ******(R, H or S)*Z***** and H200 ******(R, H or S)*Z***** without Construction Identification Code (C.I.C) marking

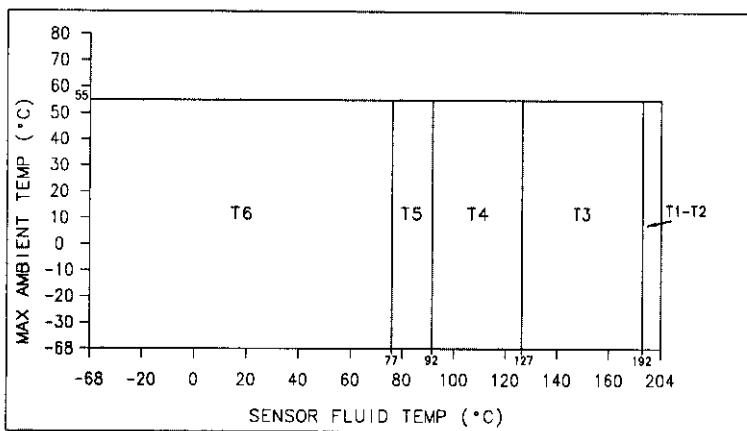

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T6: 80 °C, T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 226 °C.

Ambient temperature range T_a -40 °C up to +55 °C

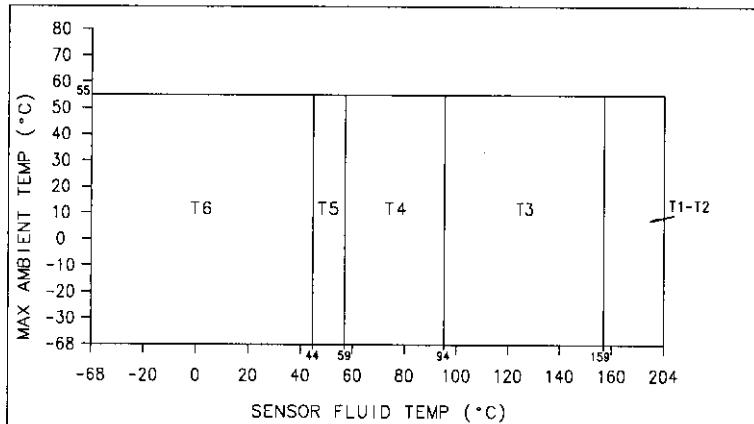

The use of the sensor at higher ambient temperatures is possible, provided that the ambient temperature does not exceed the maximum temperature of the medium taking into account the temperature classification and the maximum operating temperature of the sensor.

- 1.4.2 For types H025 ******(R, H or S)*Z***** and H050 ******(R, H or S)*Z***** with Construction Identification Code (C.I.C) marking A2 with J-box connected to non-MVD transmitters (i. e. 9701)

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T6: 80 °C, T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 207 °C. The minimum ambient and process fluid temperature allowed for dust is -40 °C.

- 1.4.3 For type H100 ******(R, H or S)*Z***** with Construction Identification Code (C.I.C) marking A2 with J-box connected to non-MVD transmitters (i. e. 9701)

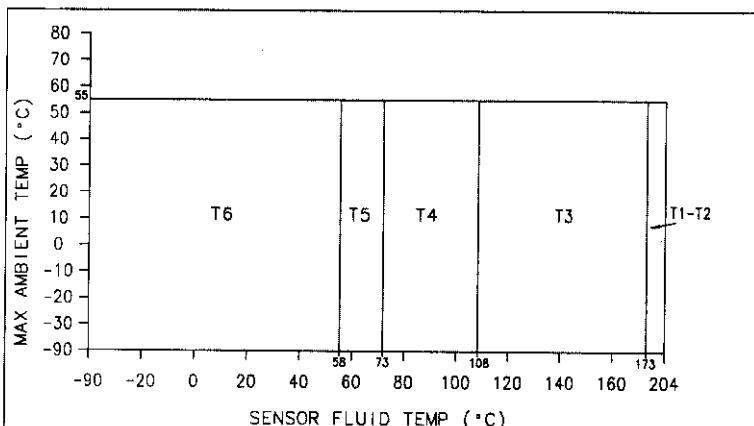

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T6: 80 °C, T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 240 °C. The minimum ambient and process fluid temperature allowed for dust is -40°C.

Ambient temperature range Ta -68 °C up to +55 °C

The use of the sensor at higher ambient temperatures is possible, provided that the ambient temperature does not exceed the maximum temperature of the medium taking into account the temperature classification and the maximum operating temperature of the sensor.

1.4.4 For type H200 *****(R, H or S)*Z***** with Construction Identification Code (C.I.C) marking A1 with J-box connected to non-MVD transmitters (i. e. 9701)

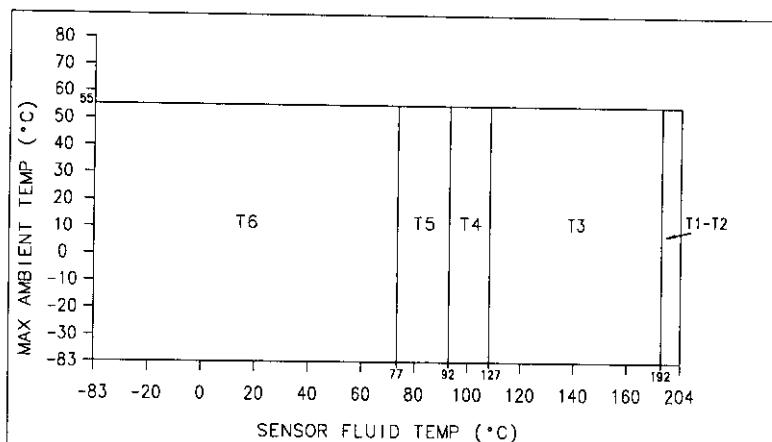

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T6: 80 °C, T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 226 °C. The minimum ambient and process fluid temperature allowed for dust is -40 °C.

Ambient temperature range Ta -90 °C up to +55 °C

The use of the sensor at higher ambient temperatures is possible, provided that the ambient temperature does not exceed the maximum temperature of the medium taking into account the temperature classification and the maximum operating temperature of the sensor.

1.4.5

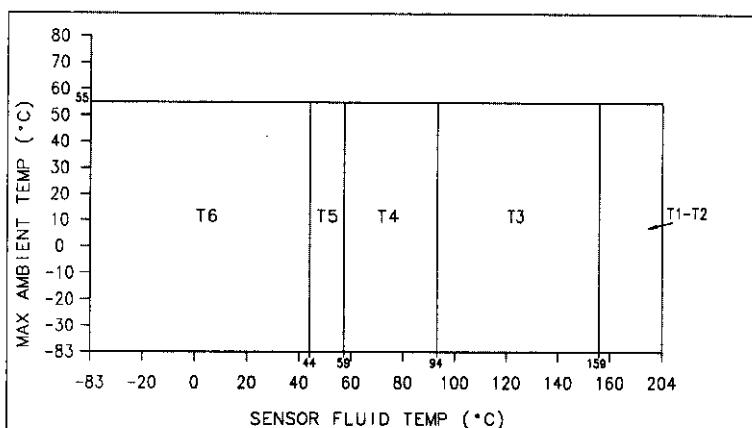

For types H025 ***** (R, H or S)*Z***** and H050 ***** (R, H or S)*Z***** with Construction Identification Code (C.I.C) marking A2 with J-box connected to MVD transmitters (i. e. 1700/2700)

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T6: 80 °C, T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 226 °C. The minimum ambient and process fluid temperature allowed for dust is -40 °C.

1.4.6

For type H100 ***** (R, H or S)*Z***** with Construction Identification Code (C.I.C) marking A2 with J-box connected to MVD transmitters (i. e. 1700/2700)

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T6: 80 °C, T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 226 °C. The minimum ambient and process fluid temperature allowed for dust is -40 °C.

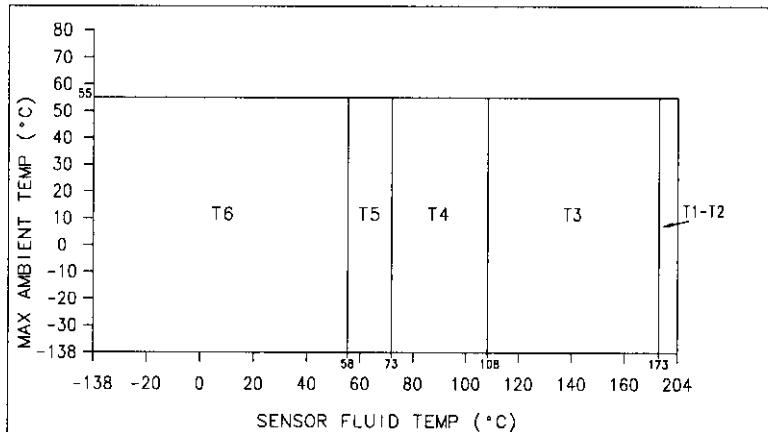

Ambient temperature range

T_a

-83 °C up to +55 °C

The use of the sensor at higher ambient temperatures is possible, provided that the ambient temperature does not exceed the maximum temperature of the medium taking into account the temperature classification and the maximum operating temperature of the sensor.

- 1.4.7 For type H200 ***** (R, H or S)*Z***** with Construction Identification Code (C.I.C) marking A1 with J-box connected to MVD transmitters (i. e. 1700/2700)

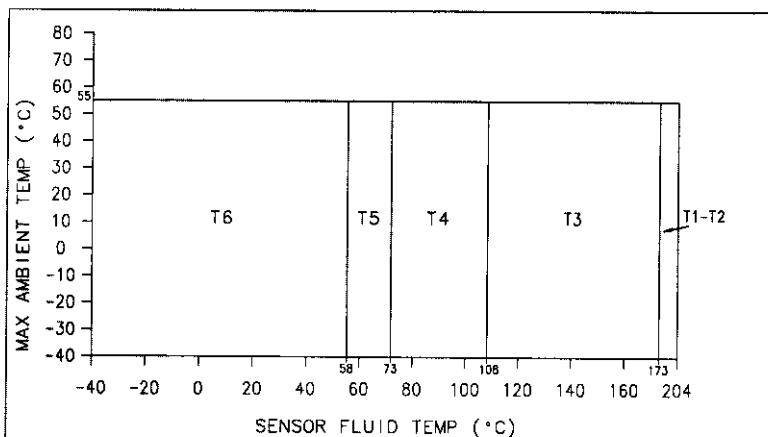

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T6: 80 °C, T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 226 °C. The minimum ambient and process fluid temperature allowed for dust is -40°C.

Ambient temperature range Ta -138 °C up to +55 °C

The use of the sensor at higher ambient temperatures is possible, provided that the ambient temperature does not exceed the maximum temperature of the medium taking into account the temperature classification and the maximum operating temperature of the sensor.

- 1.4.8 For type H300 ***** (R, H or S)*Z***** without Construction Identification Code (C.I.C) marking with J-box connected to MVD transmitters (i. e. 1700/2700)

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T6: 80 °C, T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 226 °C.

Ambient temperature range Ta -40 °C up to +55 °C

The use of the sensor at higher ambient temperatures is possible, provided that the ambient temperature does not exceed the maximum temperature of the medium taking into account the temperature classification and the maximum operating temperature of the sensor.

2 Type H**** ****(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W or Y)*Z*****

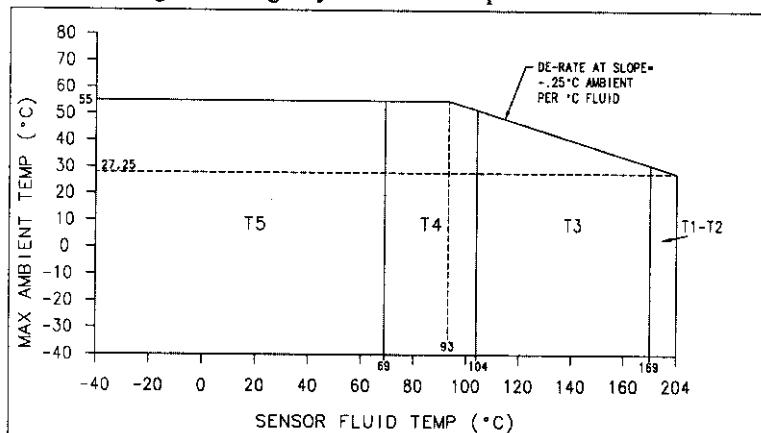

2.1 Input circuits (terminals 1 - 4)

Voltage	Ui	DC	17,3	V
Current	Ii		484	mA
Power	Pi		2,1	W
Effective internal capacitance	Ci		2200	pF
Effective internal inductance	Li		30	µH

2.2 Temperature class/ max. surface temperature T

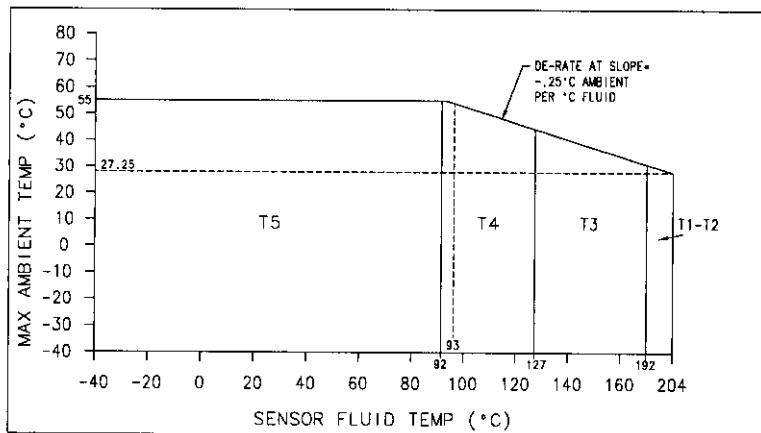

The classification into a temperature class/determination of the maximum surface temperature T depends on the temperature of the medium taking into account the maximum operating temperature of the sensor and are shown in the following graph:

- 2.2.1 For types H025 *****(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W or Y)*Z*****,
 H050 *****(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W or Y)*Z*****,
 H100 *****(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W or Y)*Z***** and
 H200 *****(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W or Y)*Z***** without Construction Identification Code (C.I.C) marking with integrally mounted core processor.

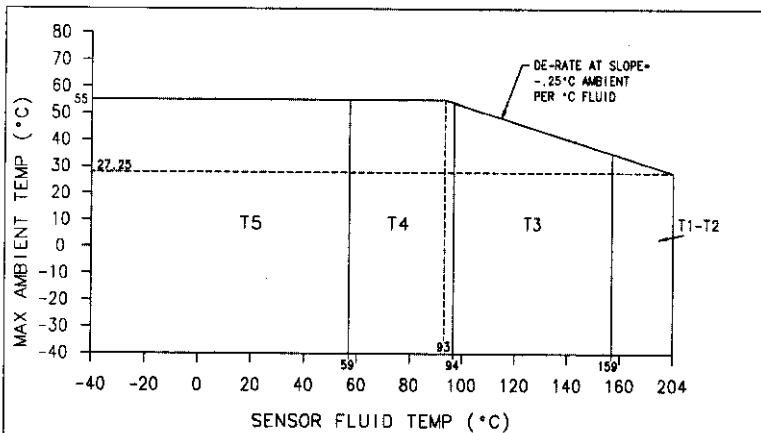

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.
 The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 230 °C.

- 2.2.2 For types H025 *****(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W or Y)*Z***** and
 H050 *****(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W or Y)*Z***** with Construction Identification Code (C.I.C) marking A2 with integrally mounted core processor.

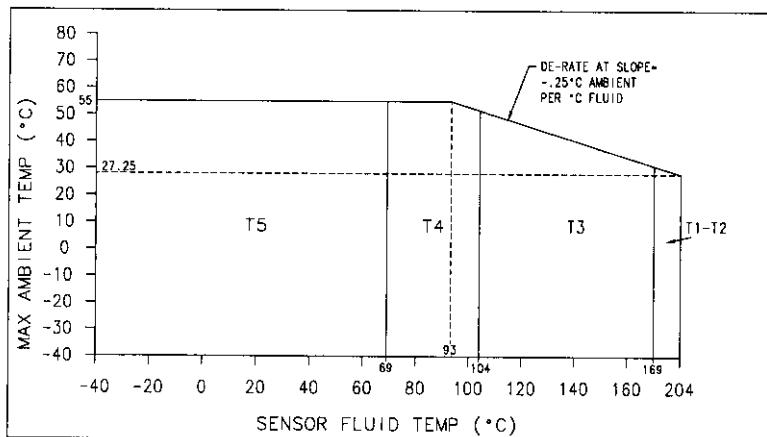

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 207 °C.

- 2.2.3 For type H100 *****(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W or Y)*Z***** with Construction Identification Code (C.I.C) marking A2 with integrally mounted core processor

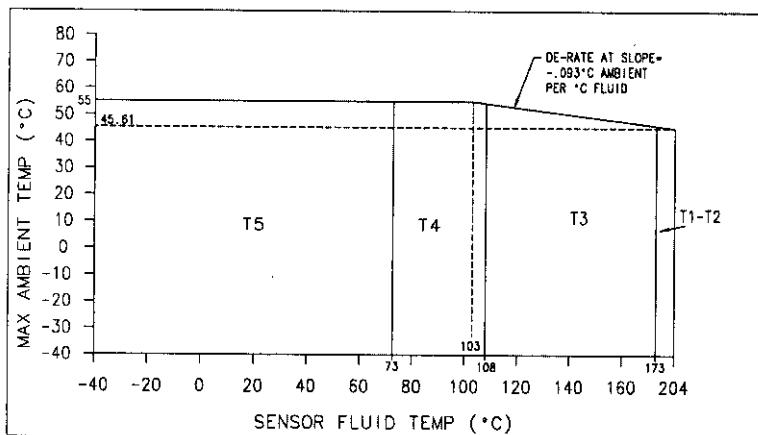

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 240 °C.

- 2.2.4 For type H200 *****(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W or Y)*Z***** with Construction Identification Code (C.I.C) marking A1 with integrally mounted core processor.

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 230 °C.

- 2.2.5 For type H300 ***** (2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W or Y)*Z***** without Construction Identification Code (C.I.C) marking with integrally mounted core processor

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 226 °C.

Ambient temperature range T_a -40 °C up to +55 °C

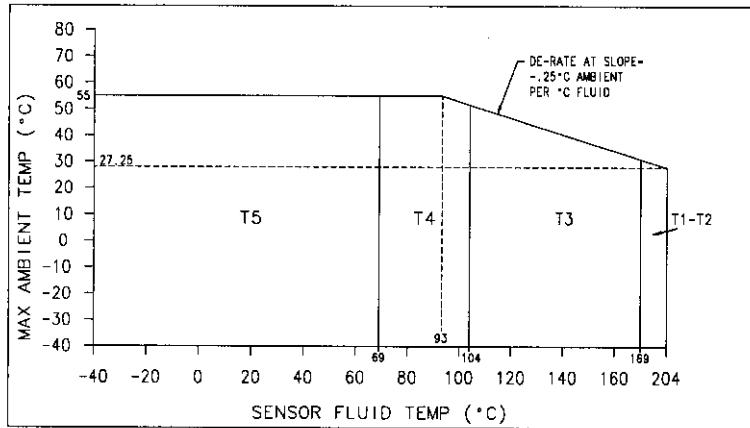

- 3 Type H*** ****(C or F)*Z*****

- 3.1 Electrical parameters see DMT 01 ATEX E 082 X for transmitter type *700*****

- 3.2 Temperature class/ max. surface temperature T

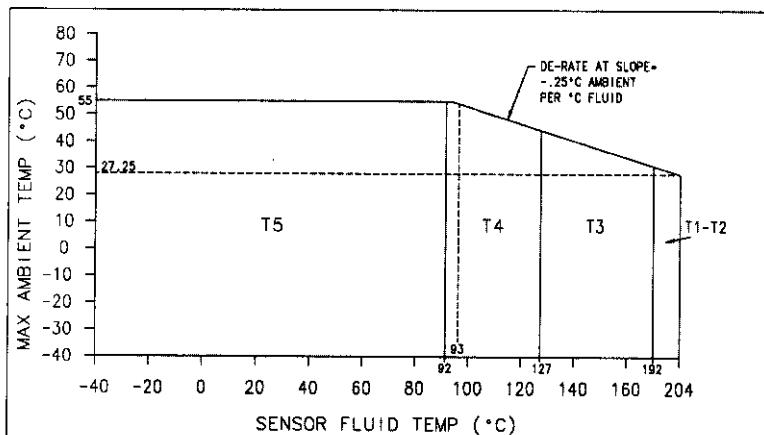

The classification into a temperature class/determination of the maximum surface temperature T depends on the temperature of the medium taking into account the maximum operating temperature of the sensor and are shown in the following graph:

- 3.2.1 For types H025 ******(C or F)*Z******, H050 ******(C or F)*Z******, H100 ******(C or F)*Z***** and H200 ******(C or F)*Z***** without Construction Identification Code (C.I.C) marking with integrally mounted core processor

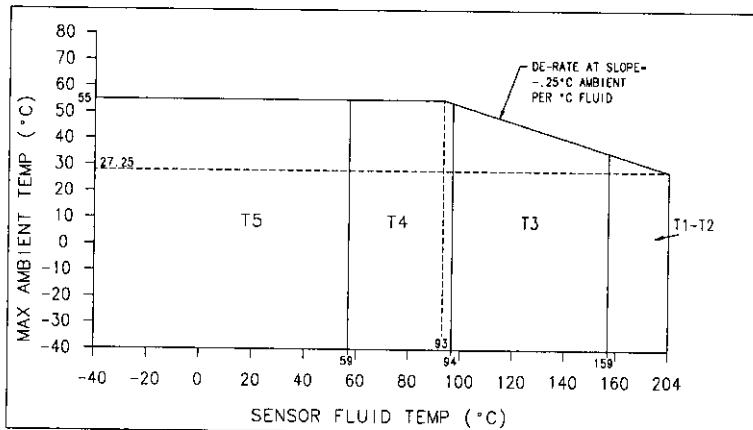

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 230 °C.

- 3.2.2 For types H025 ******(C or F)*Z***** and H050 ******(C or F)*Z***** with Construction Identification Code (C.I.C) marking A2 with integrally mounted core processor

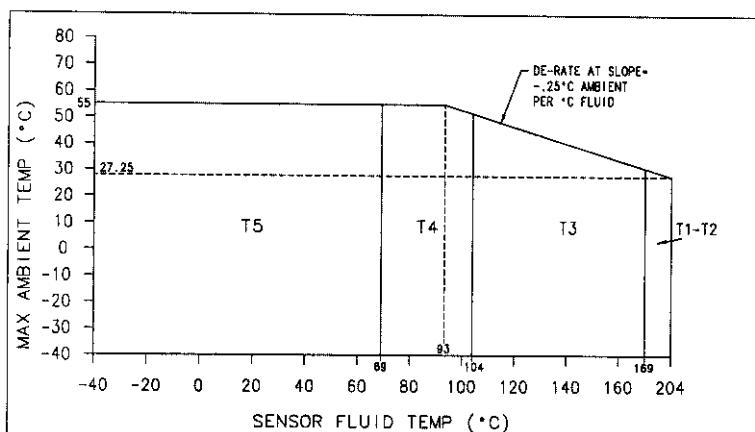

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 207 °C.

- 3.2.3 For type H100 ******(C or F)*Z***** with Construction Identification Code (C.I.C) marking A2 with integrally mounted core processor

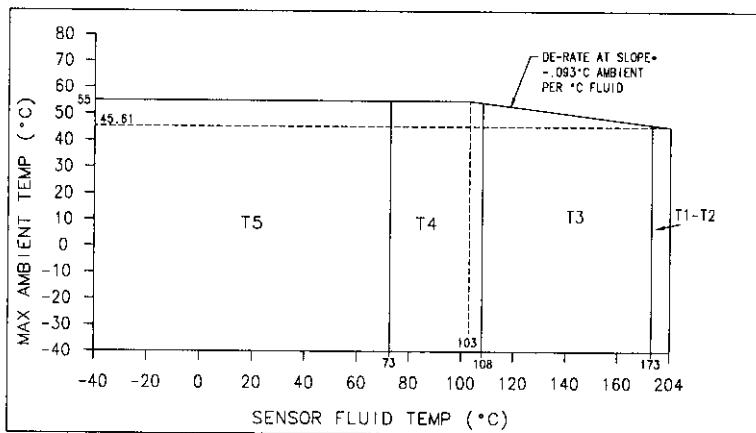

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 240 °C.

- 3.2.4 For type H200 ******(C or F)*Z***** with Construction Identification Code (C.I.C) marking A1 with integrally mounted core processor

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 230 °C.

3.2.5 For type H300 ******(C or F)*Z***** without Construction Identification Code (C.I.C) marking with integrally mounted core processor

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 226 °C.

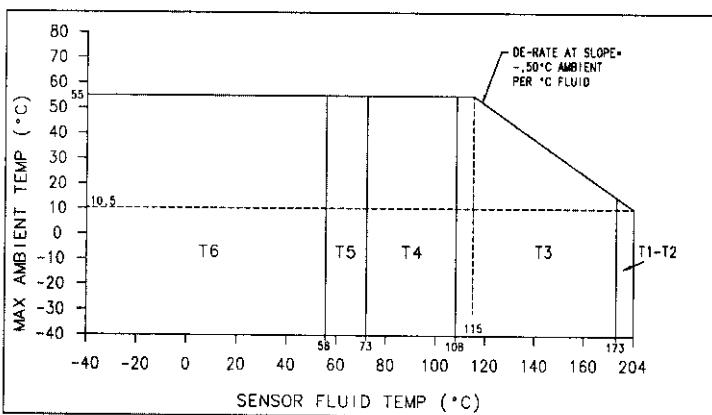

4 Type H*** *****I*Z***** (without type H300 *****I*Z*****)

4.1 Electrical parameters see BVS 03 ATEX E 168 X for transmitter type IFT9701*****

4.2 Temperature class/ max. surface temperature T

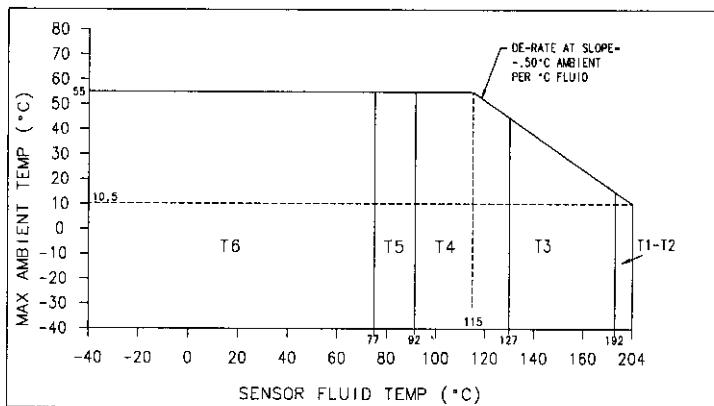

The classification into a temperature class/determination of the maximum surface temperature T depend on the temperature of the medium taking into account the maximum operating temperature of the sensor and are shown in the following graph:

4.2.1 For types H025 *****I*Z***** , H050 *****I*Z***** , H100 *****I*Z***** and H200 *****I*Z***** without Construction Identification Code (C.I.C) marking and type H200 *****I*Z***** with Construction Identification Code (C.I.C) marking A1 with integrally mounted transmitter type IFT9701*****

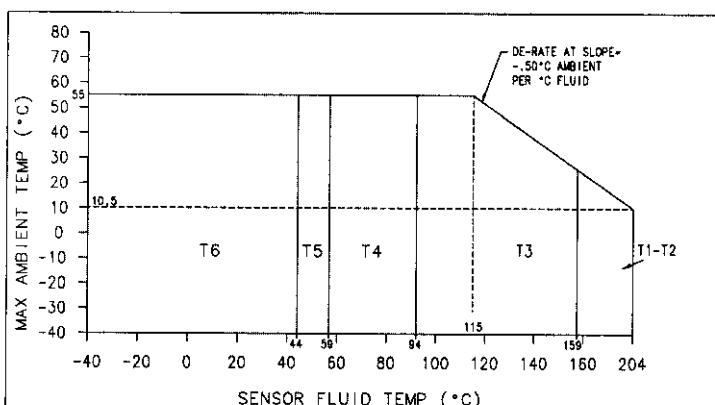

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.

- 4.2.2 For types H025 *****I*Z***** and H050 *****I*Z***** with Construction Identification Code (C.I.C) marking A2 with integrally mounted transmitter type IFT9701*****

- 4.2.3 Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.
For types H100 *****I*Z***** with Construction Identification Code (C.I.C) marking A2 with integrally mounted transmitter type IFT9701*****

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.
Ambient temperature range Ta -40 °C up to +55 °C

Special conditions for safe use

By mounting the sensor type H*** ***** (C or F)*Z***** directly to the transmitter *700***** the use of the unit will be modified according to the following:

Transmitter type	H025 ***** (C or F)*Z***** + C.I.C A2 H050 ***** (C or F)*Z***** + C.I.C A2 H100 ***** (C or F)*Z***** + C.I.C A2 H200 ***** (C or F)*Z***** + C.I.C A1	H300 ***** (C or F)*Z*****

Ladies and Gentlemen,

we added the Revision Report as of 03.04.2006 to the Test and Assessment Report
BVS PP 03.2118 EG.

We confirm, that the Certificate

BVS 03 ATEX E 177 X as of 30.06.2003, last modification of 15.02.2006

is still valid.

Kind regards

5th Supplement

(Supplement in accordance with Directive 94/9/EC Annex III number 6)

to the EC-Type Examination Certificate **BVS 03 ATEX E 177 X**

Equipment: Sensor type H*****Z*****

Manufacturer: Micro Motion, Inc.

Address: Boulder, Co. 80301, USA

Description

The sensor can be modified according to the descriptive documents as mentioned in the pertinent test and assessment report.

New versions type H***** (J or U)***** have been added.

New versions type H*****T***** have been added.

New versions type H300*****6***** have been added.

New versions type H300*****Z***** with Construction Identification Code CIC A4 have been added.

Change electrical parameters for sensors with junction box.

Add 1700/2700 Wireless HART Temp Diagrams.

Add Wireless Output Code 4 to 1700/2700 transmitters.

Add Wireless Output Code 5 and 6 to 2200 transmitters.

Revised Ambient Temp Limits to +60C for types H***** (2-9, A,B,D,E,Q,V,W,Y)*Z*****.

Also for testing of the sensors the standards EN 60079-0:2009, EN 60079-11:2007 and EN 61241-11:2006 have been taken as basis, a modified marking is the result.

The Essential Health and Safety Requirements of the modified equipment are assured by compliance with:

EN 60079-0:2009 General requirements

EN 60079-11:2007 Intrinsic safety 'i'

EN 61241-11:2006 Intrinsic safety 'iD'

Marking of sensors

1.3 Temperature circuits (terminals 3, 4 and 7 or wires orange, yellow and violet)

Voltage	Ui	DC	21.13	V
Current	Ii		26	mA
Power	Pi		112	mW
Effective internal capacitance	Ci	negligible		
Effective internal inductance	Li	negligible		

Identification resistor circuit (terminals 3 & 4 or wires orange and yellow)

Sensor type	Inductance [mH]	Coil resistance [Ω]	Serial resistor [Ω]	Min. Ambient/Fluid Temperature [°C]
H300*****(R,H,S,T)*Z*****	N/A	N/A	42.2 to 44.3	-40 °C
H300*****(R,H,S,T)*Z***** CIC A4	N/A	N/A	42.2 to 44.3	-100 °C
H300*****(R,H,S,T)*6*****	N/A	N/A	42.2 to 44.3	-100 °C

1.4 Temperature class / max. surface temperature T

The classification into a temperature class/determination of the maximum surface temperature T depends on the temperature of the medium taking into account the maximum operating temperature of the sensor and is shown in the following graphs:

1.4.1 For types H025*****(R,H,S,T)*Z***** , H050*****(R,H,S,T)*Z***** , H100*****(R,H,S,T)*Z***** and H200*****(R,H,S,T)*Z***** with J-box

Not changed

1.4.2 For types H025*****(R,H,S,T)*Z***** and H050*****(R,H,S,T)*Z***** with Construction Identification Code (CIC) marking A2 with J-box connected to non-MVD transmitters (i.e. IFT9701, RFT9739)

Not changed

1.4.3 For type H100*****(R,H,S,T)*Z***** with Construction Identification Code (CIC) marking A2 with J-box connected to non-MVD transmitters (i.e. IFT9701, RFT9739)

Not changed

1.4.4 For type H200*****(R,H,S,T)*Z***** with Construction Identification Code (CIC) marking A1 with J-box connected to non-MVD transmitters (i.e. IFT97013, RFT9739)

Not changed

1.4.5 For types H025*****(R,H,S,T)*Z***** and H050*****(R,H,S,T)*Z***** with Construction Identification Code (CIC) marking A2 with J-box connected to MVD transmitters (i.e. 1700/2700/9739MVD)

Not changed

1.4.6 For type H100*****(R,H,S,T)*Z***** with Construction Identification Code (CIC) marking A2 with J-box connected to MVD transmitters (i.e. 1700/2700/9739MVD)

Not changed

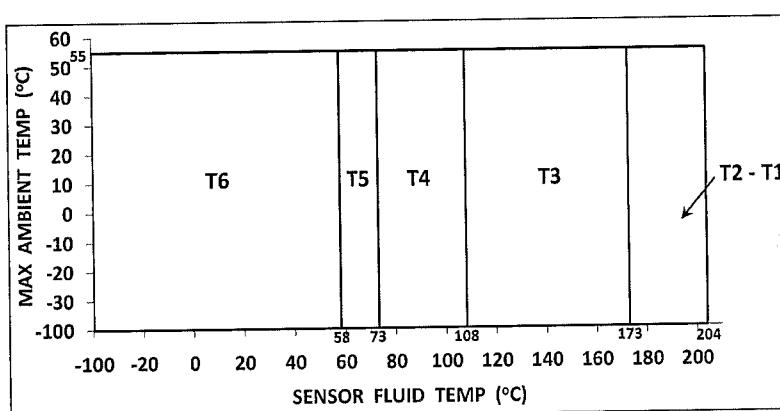

- 1.4.7 For type H200***** (R,H,S,T)*Z***** with Construction Identification Code (CIC) marking A1 with J-box connected to MVD transmitters (i.e. 1700/2700/9739MVD)

Not changed

- 1.4.8 For type H300***** (R,H,S,T)*Z***** with J-box connected to MVD transmitters (i.e. 1700/2700/ 9739MVD)

Not changed

- 1.4.9 For types H300***** (R,H,S,T)*Z***** with Construction Identification Code (CIC) marking A4 and H300***** (R,H,S,T)*6***** with J-box connected to MVD transmitters (i.e. 1700/2700/9739MVD)

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T6: 80 °C, T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 226 °C. The minimum ambient temperature allowed for dust is -40 °C.

Ambient temperature range

T_a

-100 °C up to +55 °C

The use of the sensor at higher ambient temperatures is possible, provided that the ambient temperature does not exceed the maximum temperature of the medium taking into account the temperature classification and the maximum operating temperature of the sensor.

2 Type H*** ***** (2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W, Y)*Z*****

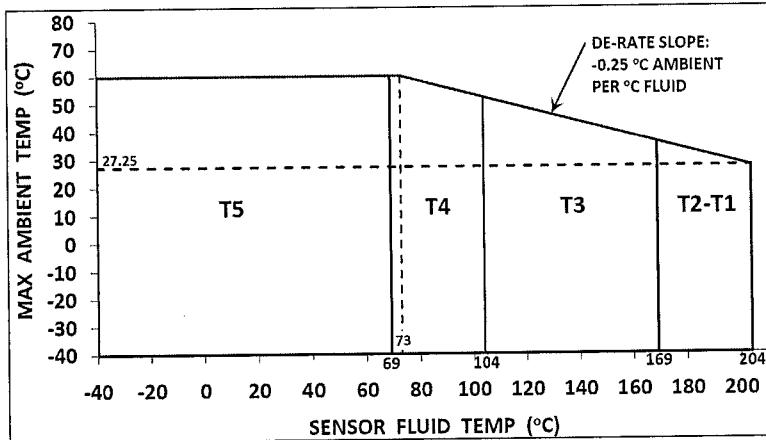

2.1 Input circuits (terminals 1 - 4)

Voltage	U _i	DC	17.3	V
Current	I _i		484	mA
Power	P _i		2.1	W
Effective internal capacitance	C _i		2200	pF
Effective internal inductance	L _i		30	μH

2.2 Temperature class / max. surface temperature T

The classification into a temperature class / determination of the maximum surface temperature T depends on the temperature of the medium taking into account the maximum operating temperature of the sensor and are shown in the following graphs:

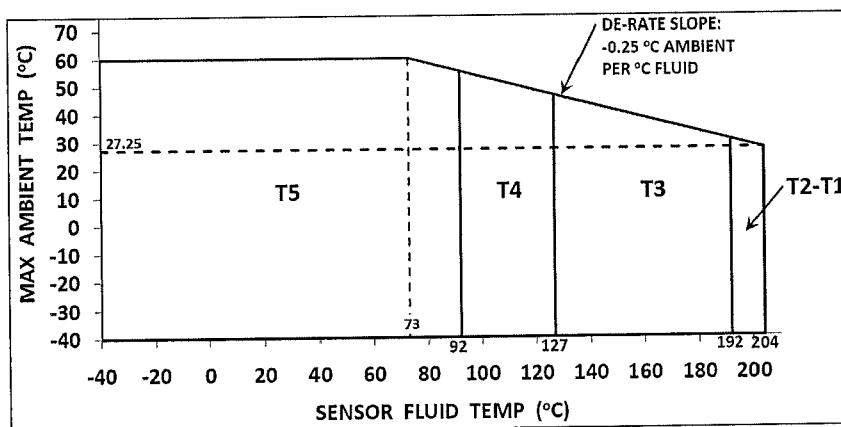

- 2.2.1 For types H025*****^{(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W, Y)*Z*****}, H050*****^{(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W, Y)*Z*****}, H100*****^{(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W, Y)*Z*****} and H200*****^{(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W, Y)*Z*****} no marking

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.
The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 230 °C.

Ambient temperature range Ta -40 °C up to +60 °C

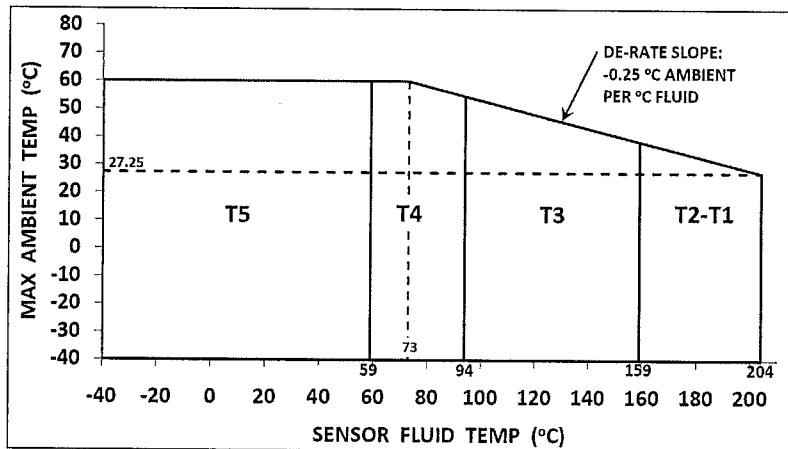

- 2.2.2 For types H025*****^{(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W, Y)*Z*****} and H050*****^{(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W, Y)*Z*****} with Construction Identification Code (CIC) marking A2

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.
The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 207 °C.

Ambient temperature range Ta -40 °C up to +60 °C

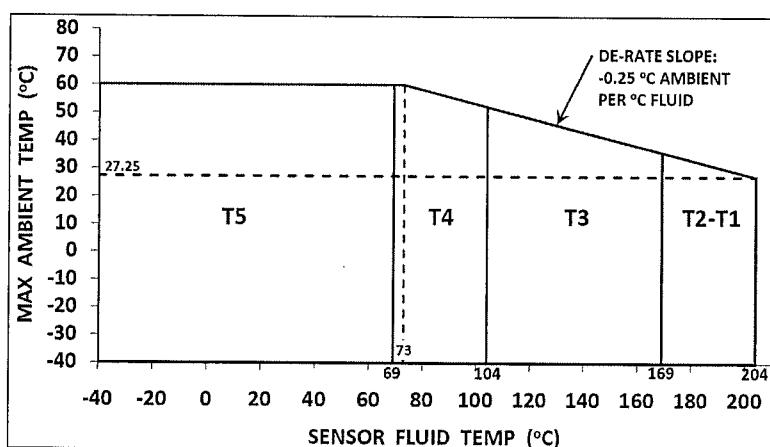

- 2.2.3 For type H100*****^{(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W, Y)*Z*****} with Construction Identification Code (CIC) marking A2

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 240 °C.

Ambient temperature range Ta -40 °C up to +60 °C

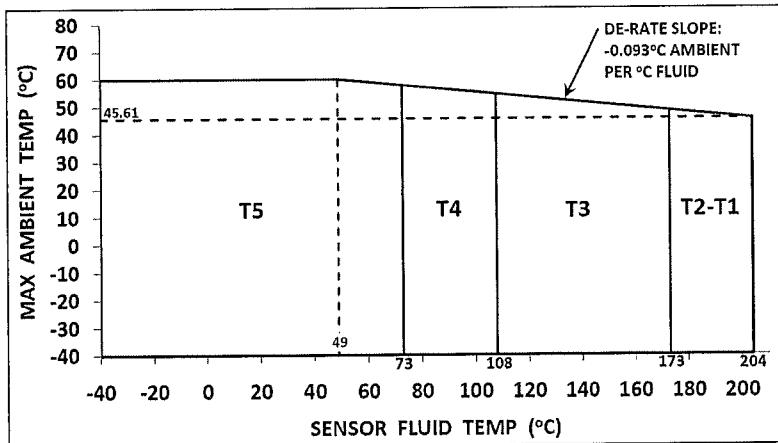

- 2.2.4. For type H200*****^{(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W, Y)*Z*****} with Construction Identification Code (CIC) marking A1

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 230 °C.

Ambient temperature range Ta -40 °C up to +60 °C

2.2.5 For types H300*****^{(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W, Y)*Z*****} with Construction Identification Code (CIC) marking A4 or no marking and H300*****^{(2, 3, 4, 5, 6, 7, 8, 9, A, B, D, E, Q, V, W, Y)*6*****}

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 226 °C.

Ambient temperature range Ta -40 °C up to +60 °C

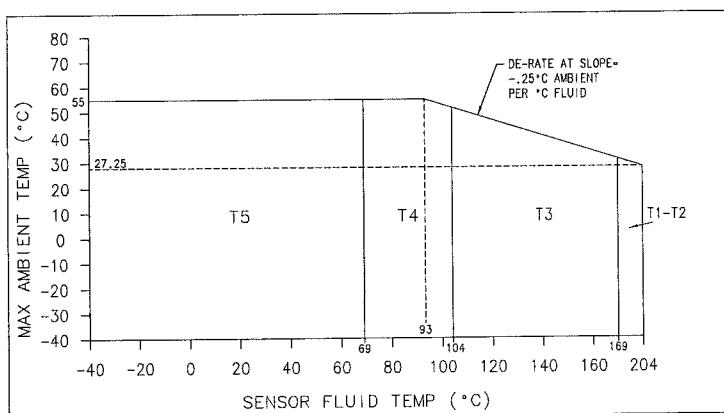

3 Type H*** *****^{(C, F)*Z*****}

3.1 Electrical parameters see DMT 01 ATEX E 082 X for the transmitter type *700*****

3.2 Temperature class/max. surface temperature T

The classification into a temperature class/determination of the maximum surface temperature T depends on the temperature of the medium taking into account the maximum operating temperature of the sensor, and are shown in the following graphs:

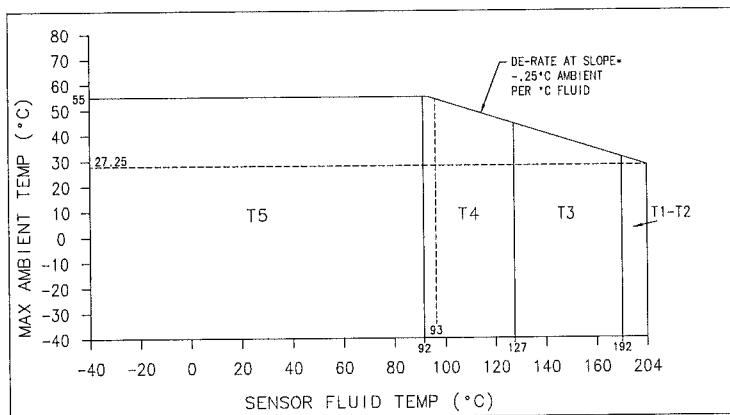

3.2.1 For types H025*****^{(C,F)*Z*****}, H050*****^{(C,F)*Z*****}, H100*****^{(C,F)*Z*****} and H200*****^{(C,F)*Z*****} no marking

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 230 °C.

Ambient temperature range Ta -40 °C up to +55 °C

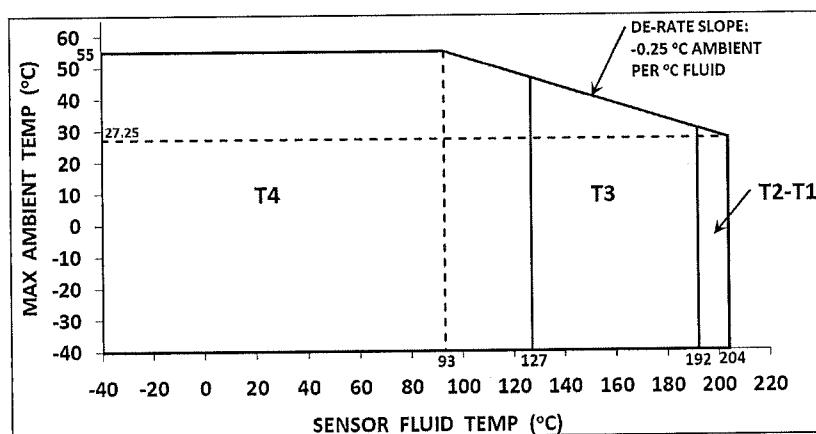

3.2.2 For types H025******(C,F)*Z***** and H050******(C,F)*Z***** with Construction Identification Code (CIC) marking A2

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 207 °C.

Ambient temperature range Ta -40 °C up to +55 °C

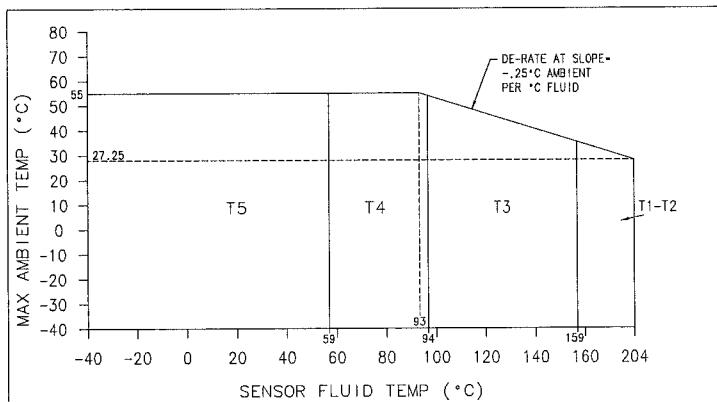

When used with 1700/2700 Transmitter with Wireless HART Output Option Code "4" (*700*1*4*****):

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.

Ambient temperature range Ta -40 °C up to +55 °C

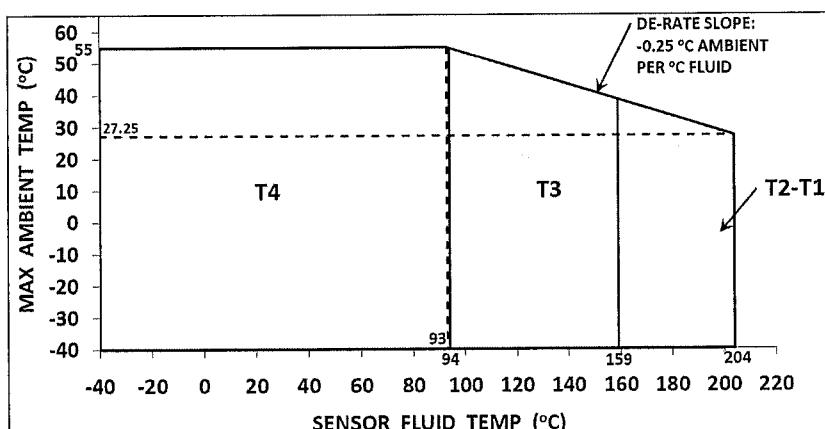

3.2.3 For type H100***** (C,F)*Z***** with Construction Identification Code (CIC) marking A2

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.
 The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2
 and T1: 240 °C.

Ambient temperature range Ta -40 °C up to +55 °C

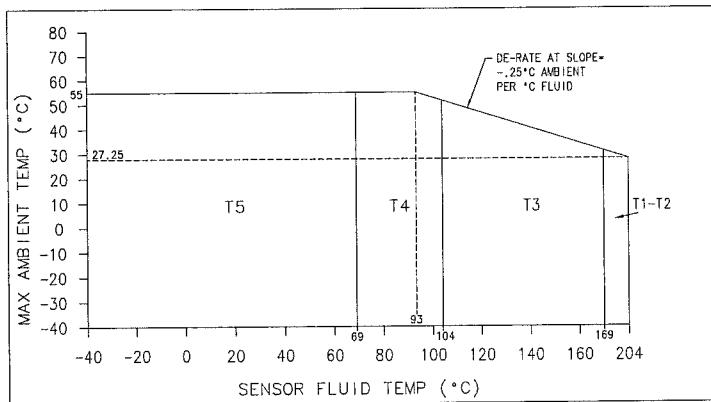

When used with 1700/2700 Transmitter with Wireless HART Output Option Code "4" (*700*1*4*****):

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.

Ambient temperature range Ta -40 °C up to +55 °C

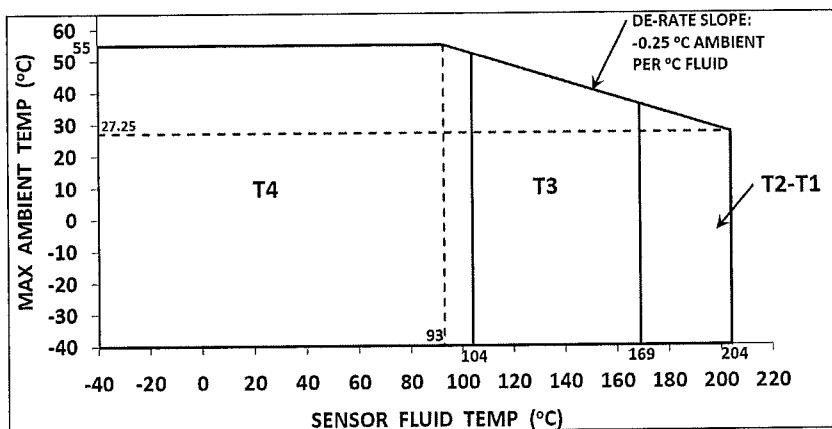

3.2.4 For type H200******(C,F)*Z***** with Construction Identification Code (CIC) marking A1

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.
The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 230 °C.

Ambient temperature range Ta -40 °C up to +55 °C

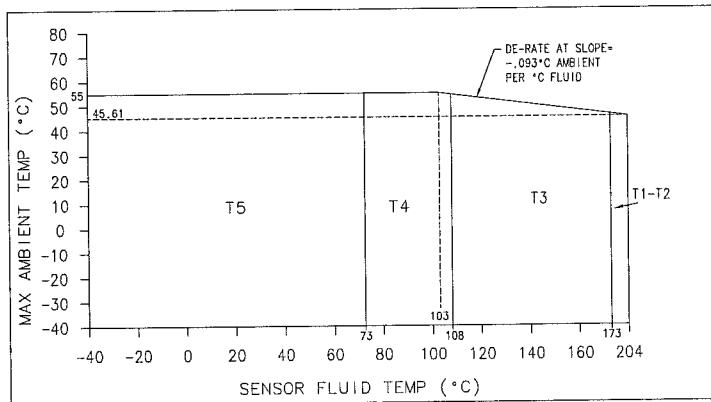

When used with 1700/2700 Transmitter with Wireless HART Output Option Code "4" (*700*1*4*****):

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.

Ambient temperature range Ta -40 °C up to +55 °C

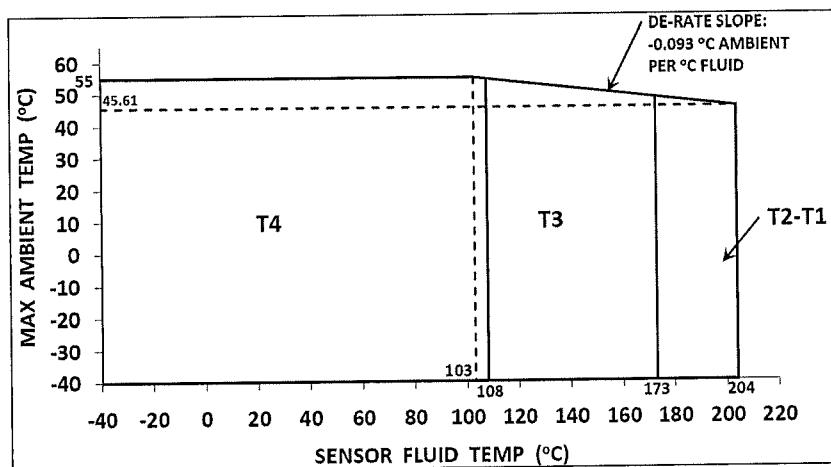

3.2.5 For types H300******(C,F)*Z***** with Construction Identification Code (CIC) marking A4 or no marking and H300******(C,F)*6*****

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.
The maximum surface temperature T for dust is as follows: T5: 95 °C, T4: 130 °C, T3: 195 °C, T2 and T1: 226 °C.

Ambient temperature range Ta -40 °C up to +55 °C

When used with 1700/2700 Transmitter with Wireless HART Output Option Code "4" (*700*1*4*****):

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature.

Ambient temperature range Ta -40 °C up to +55 °C

4 Type H******(J,U)*****

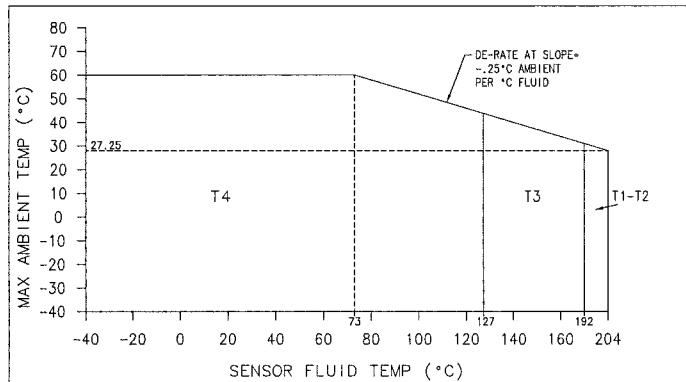

4.1 Input circuits (terminals 1 - 2)

Voltage	Ui	DC	28	V
Current	Ii		120	mA
Power	Pi		0.84	W
Effective internal capacitance	Ci		2200	pF
Effective internal inductance	Li		45	μH

4.2 Temperature class/ max. surface temperature T

The classification into a temperature class/determination of the maximum surface temperature T depends on the temperature of the medium taking into account the maximum operating temperature of the sensor and are shown in the following graphs:

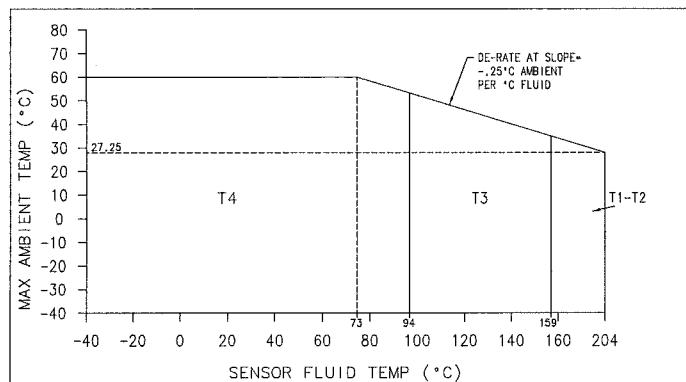

4.2.1 For types H025***** (J,U)*Z***** and H050***** (J,U)*Z***** with Construction Identification Code (CIC) marking A2 or no marking

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T4: 130 °C, T3: 195 °C, T2 and T1: 207 °C.

Ambient temperature range Ta -40 °C up to +60 °C

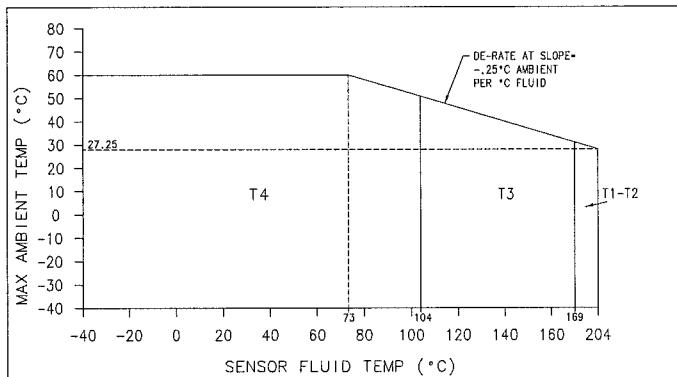

4.2.2 For type H100***** (J,U)*Z***** with Construction Identification Code (CIC) marking A2 or no marking

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T4: 130 °C, T3: 195 °C, T2 and T1: 240 °C.

Ambient temperature range Ta -40 °C up to +60 °C

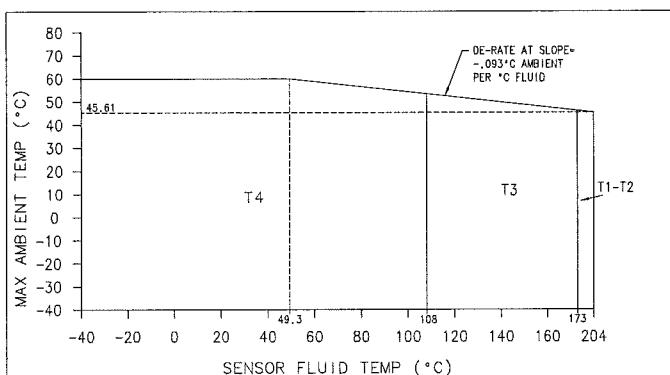

4.2.3 For type H200***** (J,U)*Z***** with Construction Identification Code (CIC) marking A1 or no marking

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T4: 130 °C, T3: 195 °C, T2 and T1: 230 °C.

Ambient temperature range Ta -40 °C up to +60 °C

4.2.4 For types H300***** (J,U)*Z***** with Construction Identification Code (CIC) marking A4 or no marking and H300***** (J,U)*6*****

Note: Use the above graph to determine the temperature class for a given fluid and ambient temperature. The maximum surface temperature T for dust is as follows: T4: 130 °C, T3: 195 °C, T2 and T1: 226 °C.

Ambient temperature range Ta -40 °C up to +60 °C

5 Type H**** *I *Z***** except H300 *****Z*****.

Not changed

Special conditions for safe use

By mounting the sensor directly to the 2200S transmitter the use of the unit will be modified according to the following table:

	Sensor type	
	H025***** (J or U)*Z***** H025***** (J or U)*Z***** CIC A2 H050***** (J or U)*Z***** H050***** (J or U)*Z***** CIC A2 H100***** (J or U)*Z***** H100***** (J or U)*Z***** CIC A2 H200***** (J or U)*Z***** H200***** (J or U)*Z***** CIC A1 H300***** (J or U)*Z***** CIC A4 H300***** (J or U)*6*****	H300***** (J or U)*Z*****

Dear Sir or Madame,

We added the Revision Report as of 15.06.2011 to the Test and Assessment Report
BVS PP 03.2118 EG.

We confirm, that the Certificate

BVS 03 ATEX E 177 X as of 30.06.2003, last modification as of 17.11.2010

is still valid.

Yours sincerely
