

Video Inspection Process for Fisher™ Valves

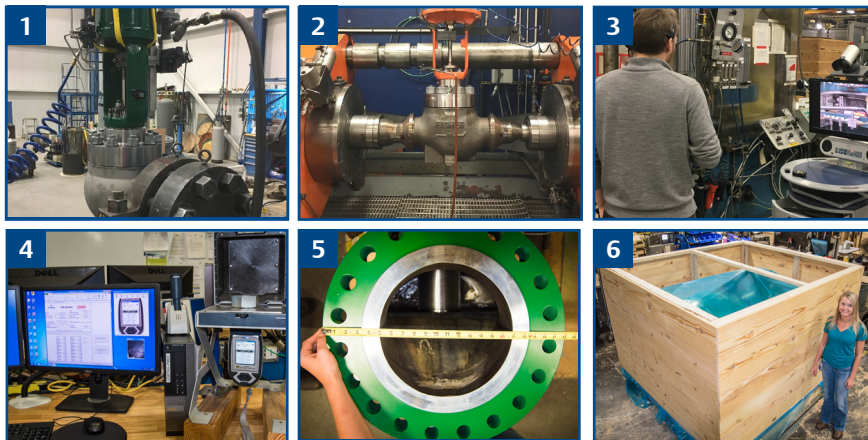

Inspections are one of the most important parts of our process, ensuring we're delivering the quality that Fisher valves are known for.

Now, in an effort to streamline orders and better meet delivery promises, we're making the process easier than ever with the option to watch a live video stream or video recording of these valve inspections.

The video inspection process adds the following benefits:

- Enables you and your inspectors to view a variety of tests from the **CONVENIENCE** of your own facilities
- Offers a **COST-EFFECTIVE** alternative to on-site inspections by eliminating travel-related expenses and time
- Provides documented accounts of valve inspections, giving you an extra layer of **QUALITY ASSURANCE** and increased confidence in product orders

Available video inspections include:

1. Operational
2. Hydrostatic
3. Seat Leak
4. Positive Material Identification (PMI)
5. Visual and Dimensional
6. Boxing

Visit Fisher.com or contact your local Emerson sales office to learn more about remote valve inspections.
