

Gerardo Muñoz*Solutions Marketing Manager**Aspen Technology*

Gerardo Muñoz is marketing manager for sustainability solutions across the AspenTech portfolio. He develops the positioning of AspenTech solutions on key sustainability areas, such as hydrogen, CCS, bio-based feedstocks and plastics circularity. He is part of the core group leading the sustainability go-to-market strategy for the company and is responsible for aligning the messaging across stakeholders.

Gerardo has worked at AspenTech since 2010, during which time he was responsible for providing technical guidance and global training on AspenTech products. In 2020, he transferred from AspenTech's Mexico City office, where he also provided sales support to oil & gas customers in Latin America, to the company's Bedford, MA headquarters in the U.S. Prior to joining AspenTech, Gerardo was an alternative fuels analyst. He researched biodiesel and microalgae as alternative sources of energy and designed equipment for carbon capture projects in the cement industry.

Gerardo holds a bachelor's degree in chemical engineering from Tec de Monterrey in Mexico, and a master's degree in sustainable chemical engineering from Chalmers University of Technology in Sweden.
