

Rosemount Quick Ship and Repair Centre

What you want, when you want it!

This Emerson Quick Ship and Repair Centre provides the local market with more than 6,000 product and service solutions for Emerson's Rosemount pressure, temperature and DP level instrumentation range, including the capability to manufacture and repair remote seals.

- Brand new instruments "manufactured to order" to match specific site applications with either 48 hour or 5 day priority dispatch
- Advanced Repair and Service capabilities to refurbish and reinstate devices to original performance and specifications (including remote seals and filled level systems)
- ISO 9001 quality endorsed and approved processes; global quality, local solution
- World class testing, calibration equipment and services to match the highest device specifications in the world

The Rosemount product offering includes over 6,000 solutions for:

- Pressure
- Temperature
- DP Level
- Manifolds
- Hazardous Area locations
- Safety Certified requirements
- HART & Foundation Fieldbus
- Local industry requirements

By utilising this investment organisations will be able to achieve operational benefits by

- Reducing site inventory through locally manufactured products delivered in short lead times
- Getting measurements back on line quickly with critical order support
- Managing lifecycle costs by cost effectively repairing and maintaining devices
- Freeing up maintenance time by utilising Rosemount repair and calibration services to complete routine work
- Protecting device investments by maintaining them at original performance and specifications through OEM repair & testing
- Ensure plant safety with hazardous compliance testing of devices
