Cordless Backpack VS. Upright Vacuum

If each year **1%** of **United States commercial floor space** cleaned using **ProTeam's** revolutionary GoFree® Flex Pro cordless backpack in a cleaning system (instead of a dual motor upright)[1] we would **SAVE**[2]:

$1,400,000
in energy costs[3]

and

14,000,000 kWh of electricity

This is about the same amount of annual energy or emissions from powering 1,300 homes, or lighting 79,000 light bulbs, or removing 2,000 cars from the roads, or offsetting emissions by planting 247,000 tree seedlings.
